Reading Self-Portraits:
guide curriculum, make meaning, show literacy understanding
Presented by Lauren McCann B.Ed., M.A., Ph.D.

Quick Overview:

Duration of Study: September – June (academic year)

Students: total of 26 boys and girls ages five to six

Demographic: upper middle class private school

Task: “Draw yourself reading”: Reading-self-portraits were completed bi-monthly and used to start conversation and guide lessons about reading. The students spoke about their illustrations and these narratives were recorded.

Data: A total of 5 drawings and their accompanying narratives were collected from each child. These images were analyzed according to a created chart based on the completed drawings, the narratives and past methods of drawing analysis. Please see Appendix “A” for an example.

Purpose: to obtain the child’s perspective on literacy, start meaningful conversations about reading from the point of view of the student, teach standard 3 from the International Reading Association in a concrete manner, document the progress of each child over the academic year

Learner Outcomes Of this Project:

• Students will develop a positive identity as a reader.
• Students will learn the various facets of reading (who, what, when, where, why) through real-life context.
• Students will start expressing their experiences with books and compare and contrast them with their peers.

Steps to Take For Implication:

1. Explain to the class what a self-portrait is. Show examples.
2. Talk about the reading you do both in and out of class.
3. Talk about who reads, what we read, where we read and why we read.
4. Give each student a blank sheet of paper and drawing tools such as markers, colored pencils or crayons -not paint. Paint will bleed and make marks the child did not intend.
5. Ask the students to draw themselves reading. Have them think about the class discussion.
6. Once completed, use the students’ drawings to start conversation about their experiences with reading and literacy.
7. Collect the drawings and store them for a few months.
8. Once completed, use the students’ drawings to start conversation about their experiences with reading and literacy.
9. Use the information collected to guide your curriculum choices and to inform you regarding the students’ self-perceptions as a readers.

Extensions: Use drawing to illustrate understanding of any activity done in class.
Eg: Draw yourself playing safely in the yard, sharing with a friend, playing at our math center. Through the act of drawing, the child places himself/herself in the position of power by choosing what he/she wants to draw. The drawing then provides the child with a framework for expressing his or her ideas.

**Put Research to Practice:**

Consider these questions for yourself to guide your class discussion:

- Why do you read?

- Do you read for another purpose?

- When do you read?

- Where do you like reading best?
• What do you enjoy reading?
<table>

**Literacy Links**

primary image | primary image | primary image | primary image | secondary image |

- has shared reading experiences at home | - has interpreted literacy lesson of choosing books “just right for you”, and put into practice by illustrating baby sister with a smaller book | - had interpreted reading experience from home, a reading method I taught to parents | - is viewing self now as an independent reader | - reading can be part of fantasy or - child simply wanted to do what she wanted to do |

**Themes:**

- books drawn | - books drawn | - book drawn | - book is drawn
- sharing reading | - shared reading | - only reader, reading independently
- connection to home | - reference to in class lesson | - reference what she could do.
- reading on own | - reading on own | - book is drawn

**Drawing’s key details:**

- all smiling | - all smiles | - all smiles
- sun in top corner | - sun in top corner | - not a full smile
- student book HUGE | - big heart | - simple figure, more developed since September
- little sister book small | - image of people copied from peer, more details with ears | - figure most developed, fingers and separate body parts
- image of person basic | - image of person growing | - can’t link Lowenfeld with experience

**Lowenfeld:**

draws what knows books have words
big book, big= important
student now knows one can do this
can’t link Lowenfeld with experience

**Kellogg (1969)**

- H18: humans in groups, Humans with varied torsos
- standard

- relatively competed human image
- H19: stick man, copied from neighbour
- standard

- relatively completed human image
- above
- relatively completed human image

**Goodnow**

units= circle, rectangle, on axis, no crossing of units
units= circle, rectangles, asymmetric shapes, no crossing of units
(more units used)
copied peer

(units= circle, rectangles, no crossing of units)(same units used)
copied peer

(units= circle, rectangles, no crossing of units)(same units used, more detail)
units: circles, now also found in fingers and feet, rectangles, squares now used to depict more details of shorts, legs, neck and arms.
