Dr. Donalyn Heise: Associate Professor, Art Education: University of Memphis

Dr. Emily “Boo” Ruch, NBCT: Retired Art Educator, Consultant, Mentor & Curriculum Developer

The Partnership To Advance Learning is a national initiative designed to support teachers in the non-tested areas (visual art, world languages, music, etc.) from any school system - public, private, or independent - by providing quality professional development to support teacher growth.

The *Teacher Effectiveness for Art Learning* (TEAL) Project, an initiative of AdvanceLearning, is a collection of tools and processes that can be used, free of charge, to enhance the effectiveness of art teachers. TEAL, which emanates from an understanding that student achievement is influenced more by an effective teacher than any other factor, attempts to synthesize work from the general education arena regarding those things that effective teachers do, and make that information specific to the work of art teachers. The heart of the TEAL Project is the Teacher Effectiveness for Art Learning Framework, which is supported by a variety of tools and resources.
