Annotated Bibliography

http://www.legofoundation.com/it-it/research-and-learning/foundation-research/cultures-creativity
In this short article, Ackermann explains the necessity of cultivating a creative environment that not only promotes a curiosity to make that is inherent in DIY culture, but to reclaim DIY as BIIT or being in it together. This shift brings an important awareness to the social nature of creating and how a collaborative environment yields a specific level of in-built support for every participating maker.

Schwartz, Katrina. "How Integrating Arts Into Other Subjects Makes Learning Come Alive."
https://ww2.kqed.org/mindshift/2015/01/13/how-integrating-arts-into-other-subjects-makes-learning-come-alive/
This article shows how the arts can collaborate across learning disciplines to create an even stronger and cohesive learning environment.

https://k12.thoughtfullearning.com/FAQ/what-are-learning-skills
This resource contextualizes the concept of collaboration and outlines each of the learning, literacy and life skills that are needed for a student to succeed in the “information age.”
